

Full-Day Workshops

Whole House Audio Distribution \$399

Whole house audio systems are one of the most desired systems incorporated into new homes and remodeling of existing homes. Today's home audio systems are much more complicated than a simple stereo system. This intensive and interactive workshop teaches what students need to know to successfully install complex audio systems and maximize their performance for the listeners' enjoyment.

Home Theater \$399

Today's home theater system brings the excitement of a movie theater experience into the comfort of the home. This intensive workshop covers the information needed to design and install a variety of home theater systems, from a small home theater in the family room to a large dedicated theater room. Gain a thorough understanding of all the elements necessary to design, install, and maximize the viewer's experience.

Home Networking \$399

Computer networks are fast becoming a critical part of the digital home and every installer is being asked to connect or install various network devices. Designed specifically for residential technology installers, this intensive workshop covers the capabilities, benefits and components of home networks for sharing computers, controlling and providing entertainment and Internet access. Students get a thorough grounding in the design and configuration of home networks and know how to successfully install a computer network with this practical, not theoretical, comprehensive introductory workshop.

DHTI+ Certification Preparation \$399

Prepare for certification testing by CompTIA on the broad array of home technologies. This workshop assumes core competencies and is an intense review of Networking, Audio/Video, Telephone/VoIP, Security and Surveillance, Home Control Management, Documentation and Troubleshooting. Ensure that your knowledge base covers all subsystems with this workshop.

Project Management \$499

Manage projects efficiently and effectively. This interactive workshop gives you procedures, forms and documents to get organized and in control of your projects and processes. Return to your business with 'tools' and tips you will use right away. Get work flowing smoothly with proven methods.

Business Essentials for Profitability \$599

Get your company to profitability faster with proven business methods. This workshop teaches you the secrets no one tells you about running a successful installation business. Workshop materials and exercises empower you with immediate and specific action items. Get the results you deserve—time and money!
