Bedrock Learning and Global Caché Form Partnership *Companies Team-up to Support Installation Businesses with Education*

Holland, Michigan – October 30th, 2006 – Bedrock Learning, the leading training company for residential technologies, and Global Caché, the award winning provider of IP-enabling products for homes and businesses, announced today their newly established partnership which will provide and promote easily accessible online educational courses.

Bedrock Learning provides comprehensive training solutions designed for home technology installers, sales, customer support, and other residential technology professionals. Bedrock offers 24/7 online course delivery through a standard web browser with educational instruction ranging from introductory level classes to more complex whole house networking and audio/video distribution courses.

Global Caché's products are engineered to connect any common household device to a network so it can be controlled, accessed, and maintained. Global Caché's products connect infrared (IR), serial (RS232), and relay (contact closure) devices to a network in minutes. Other Global Caché products include an IR learner, sensors, and IR receivers for sending information over a network.

"Home networking is really starting to take off, but it's still a relatively new industry," said Walt Keller, Global Caché President. "Because we offer IP-enabling products we constantly receive technical questions from installers new to networking. Now we can point our installers to specific courses they can benefit from, and because Bedrock Training's courses are available online 24/7, they allow the installer to gain important industry knowledge and training without impacting their job schedule."

Helen Heneveld, President of Bedrock Learning, said, "We've seen many advances in the residential technology market over the past few years and Global Caché's network-enabling products have played an important part in some of those advancements. Our new partnership will allow us to enhance our course content and develop co-marketing activities to benefit our respective customers. We're very pleased that Global Caché has chosen to endorse and recommend us to their dealer channel. We look forward to working together to help advance technology in the home."

About Bedrock Learning, Inc.

Bedrock Learning provides foundational training and business resources for the residential technologies industry. Based on more than 25 years of industry training and curriculum development experience, the company was founded in 2004 by long time industry leader, Helen Heneveld. Bedrock Learning provides students with convenient 24/7 access to online training through its Online Training Center along with printed books and materials. Students completing online courses can earn CEUs from organizations such as CEDIA, NBFAA, and infoCOMM. Custom curriculum and online training/hosting are also available from Bedrock Learning. For more information on Bedrock Learning training and resources, call us at 616.335.6206 or visit www.bedrocklearning.com.

About Global Caché, Inc.

Global Caché is dedicated to producing state-of-the-art products that enable technology in homes and businesses. Our award-winning GC-100 Network Adapter provides the means for PC-based automation and management software to access, control, and deliver services in a networked home or business to diverse and previously unconnected devices and appliances. In addition, Global Caché provides an IR learner, winner of the prestigious CEPro Product of the Year award for IP-enabling, receivers, sensors, and other connectivity products. Global Caché sells through distributors, VARs, and OEMs. For more information on Global Caché and our products and services, visit online at www.globalcache.com or call us at 541-899-4800.
